

# Human BioMolecular Atlas: Maps and Macroscopes

Katy Börner

Victor H. Yngve Distinguished Professor of Information Science

Director, Cyberinfrastructure for Network Science Center

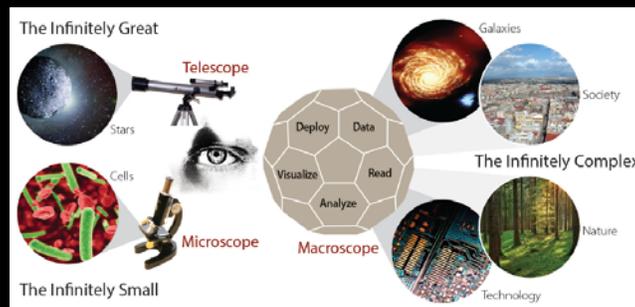

School of Informatics and Computing and Indiana University Network Science Institute

Indiana University, USA

*Identifying Key Areas in a Human BioMolecular Atlas NIH Common Fund Planning WS*

*NIH Campus, Natcher Conference Center, Room D*

*June 15, 2016*

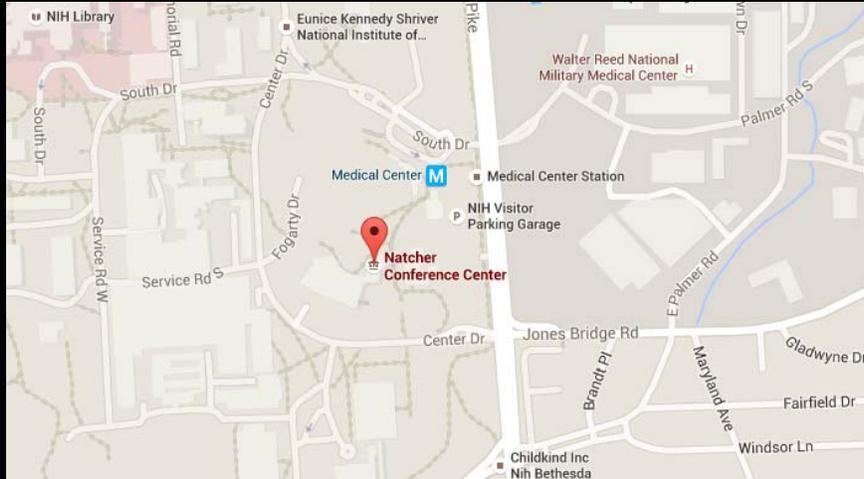

## Basic Approach

&

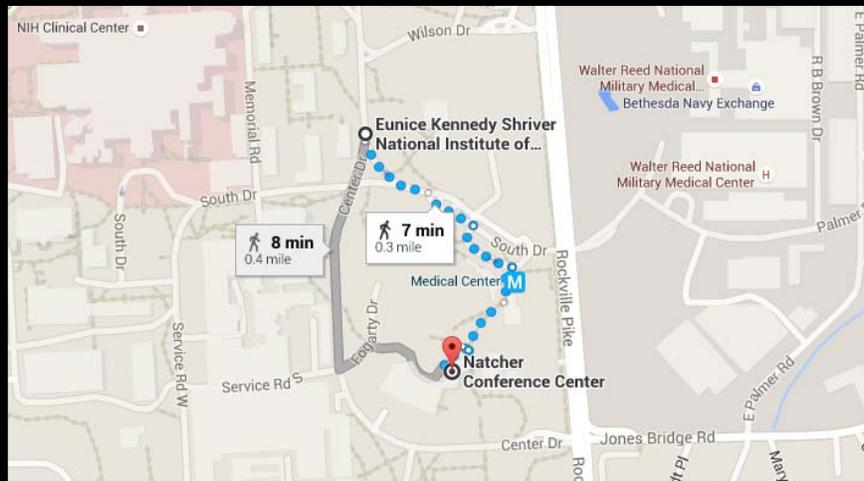

## Basic Questions

## Basemap vs. Data Overlay

Google map of current geolocation

## Different Types of Data Overlays

Path from current geolocation to Eunice Kennedy Shriver

Mapping Data

&

Interacting with Data

Multi-level: Micro to macro

Aim for constant information density.

## Multi-resolution: Focus and context

By Fernando Vicente

## Level of abstraction

By Fernando Vicente

Bodyworlds by Gunther von Hagens

## Projections

Dymaxion Map by B. Fuller

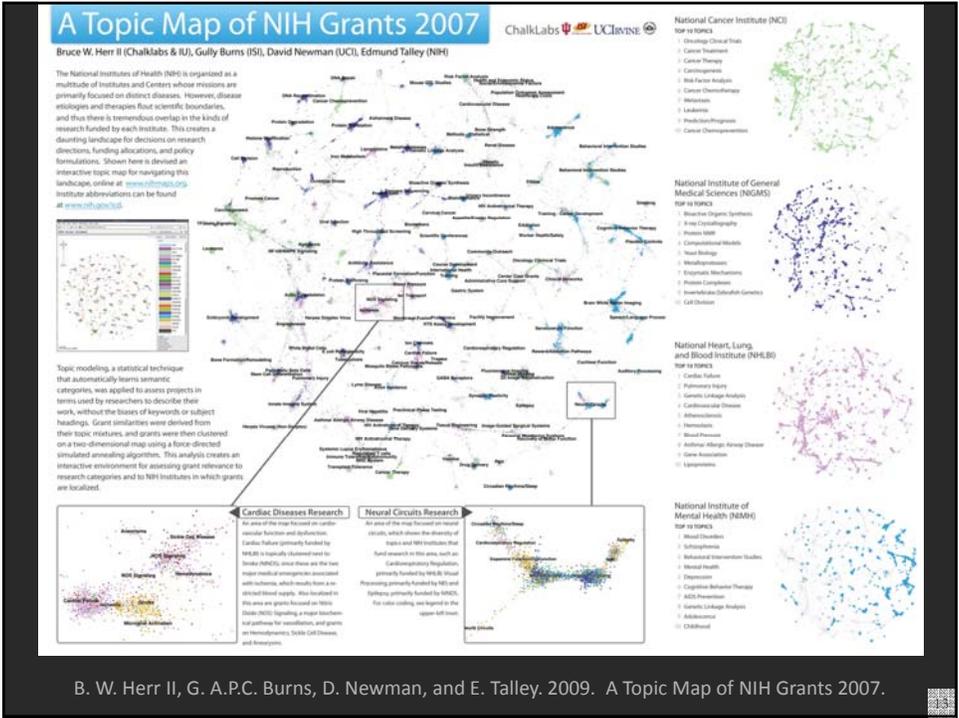

Bodyworlds by Gunther von Hagens

Seeing Patterns and Trends

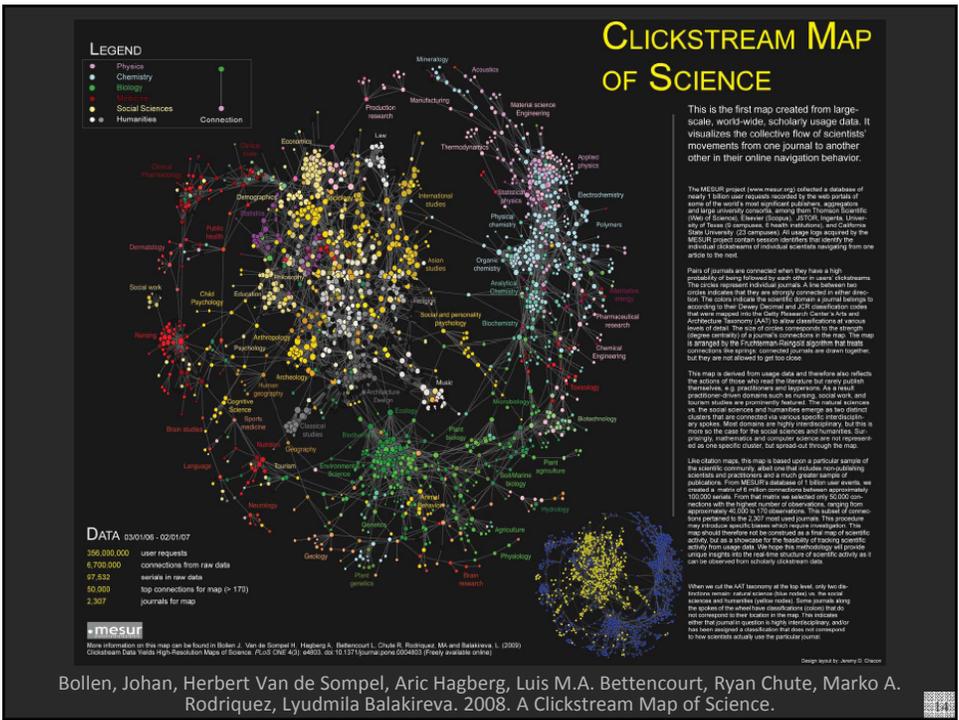

&

Connecting Experts

B. W. Herr II, G. A.P.C. Burns, D. Newman, and E. Talley. 2009. A Topic Map of NIH Grants 2007.

Bollen, Johan, Herbert Van de Sompel, Aric Hagberg, Luis M.A. Bettencourt, Ryan Chute, Marko A. Rodriguez, Lyudmila Balakireva. 2008. A Clickstream Map of Science.

# Visualization Design

&

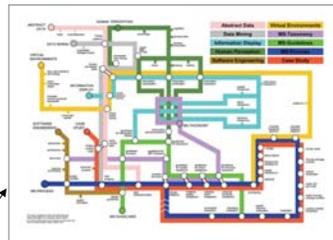

# Interactivity Design

## Different Question Types

Terabytes of data

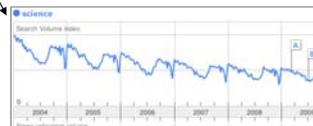

Descriptive &  
Predictive  
Models

Find your way

Find collaborators, friends

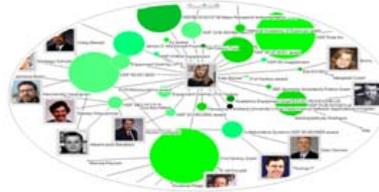

Identify trends

# Different Levels of Abstraction/Analysis

Macro/Global  
Population Level

Meso/Local  
Group Level

Micro  
Individual Level

## Tasks

### LEVELS

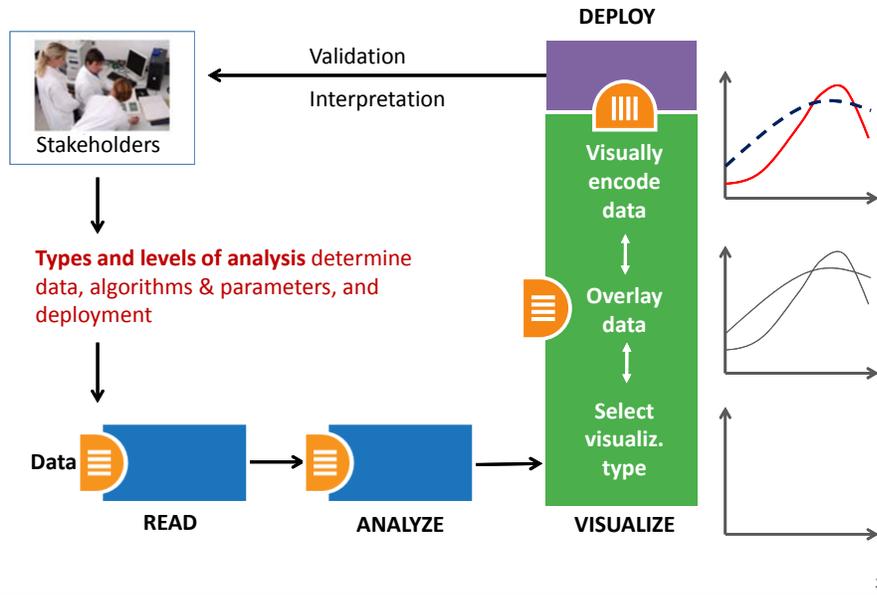

### TYPES

	MICRO: Individual Level about 1-1,000 records page 6	MESO: Local Level about 1,001-100,000 records page 8	MACRO: Global Level more than 100,000 records page 10
<b>Statistical Analysis</b> page 44			
<b>WHEN: Temporal Analysis</b> page 48			
<b>WHERE: Geospatial Analysis</b> page 52			
<b>WHAT: Topical Analysis</b> page 56			
<b>WITH WHOM: Network Analysis</b> page 60			

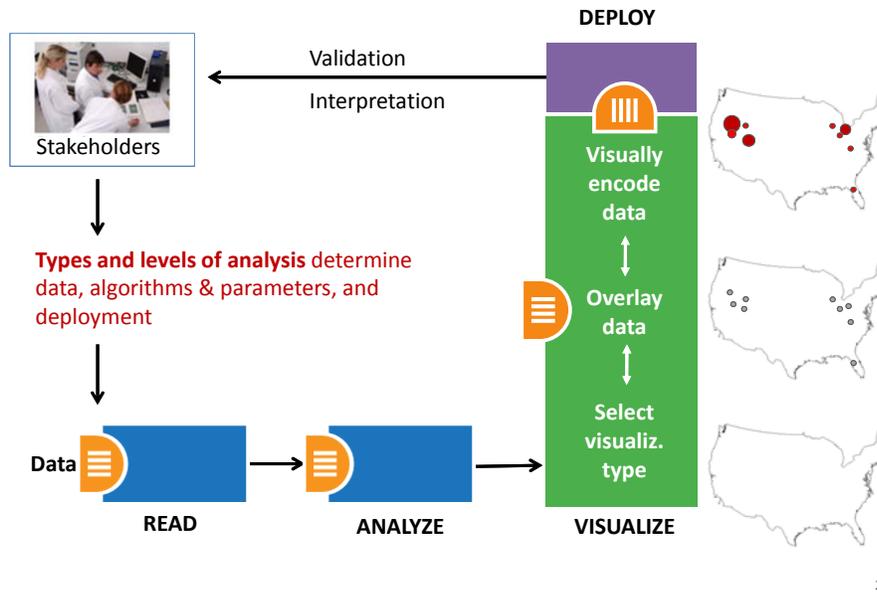

See page 5

## Needs-Driven Workflow Design

# Visualization Framework

Basic Task Types								
Bertin, 1967	Wehrend & Lewis, 1996	Few, 2004	Yau, 2011	Rendgen & Wiedemann, 2012	Frankel, 2012	Tool: Many Eyes	Tool: Chart Chooser	Börner, 2014
selection	categorize			category				categorize/cluster
order	rank	ranking					table	order/rank/sort
	distribution	distribution					distribution	distributions (also outliers, gaps)
	compare	nominal comparison & deviation	differences		compare and contrast	compare data values	comparison	comparisons
		time series	patterns over time	time	process and time	track rises and falls over time	trend	trends (process and time)
		geospatial	spatial relations	location		generate maps		geospatial
quantity		part-to-whole	proportions		form and structure	see parts of whole, analyze text	composition	compositions (also of text)
association	correlate	correlation	relationships	hierarchy		relations between data points	relationship	correlations/relationships

# Visualization Framework

### Geographic Map: Where Science Gets Done

North America, Europe, North & East Asia, South & East Asia, Oceania, South America, Africa, Australia, Americas

### Science Map: How Scientific Disciplines Relate

Math & Physics, Chemistry, Health Professions, Social Sciences, Medicine, Agricultural, Chemical, Mechanical & Civil Engineering, Electrical Engineering & Computer Science, Biotechnology, Infectious Diseases, Brain Research, Earth Sciences, Biology, Humanities

Copyright © 2008 The Regents of the University of California

**About**

This illuminated diagram display adds the flexibility of an interactive program to the incredibly high data density of a print. This technique is generally useful when there is too much pertinent data to be displayed on a screen but the data is relatively stable. The computer can direct the eye to what's important by using projectors or screens as smart spotlights, animating the research impact of individuals, giving a "grand tour" of science, or highlighting query results (as when you touch the lectern or use the keyboard) with an overlay of moving light.

<http://scimaps.org>

**Top Five Continents**

- North America - 4,000 records
- South & East Asia - 3,589
- Australia - 2,421
- Africa - 2,208
- South America - 1,562

**Top Five Scientific Disciplines**

- Math & Physics - 4,000 records
- Health Professions - 3,589
- Social Sciences - 2,431
- Aeronautical, Chemical, Mechanical & Civil Engineering - 2,208
- Humanities - 1,562

Input your search query here

**Go**

**Search**

The keyboard supports retrieval and display of papers based on their Medical Subject Headings (MeSH) and MeSH qualifier terms. If multiple terms are entered in a field, they are automatically combined using "OR". So, "breast cancer" matches any record with "breast" or "cancer" in that field. You can put AND between terms to combine with "AND". Thus "breast AND cancer" would only match records that contain both terms. Double quotation can be used to match compound terms, e.g., "breast cancer" retrieves records with the phrase "breast cancer", and not records where "breast" and "cancer" are both present, but the exact phrase.

**Elinor Ostrom - Nobel Prize in Economic Sciences 2009**

**Born:** 7 August 1933, New York, NY, USA

**Affiliation at the time of the award:** Indiana University, Bloomington, IN, USA, Arizona State University, Tempe, AZ, USA

**Prize motivation:** "for her analysis of economic governance, especially the commons"

**Field:** Economic governance

**Contribution:** Challenged the conventional wisdom by demonstrating how local property can be successfully managed by local commons without any regulation by central authorities or privatization.

Cancer	Cloning	HIV	Robert G. Edwards	Roger D. Kornberg	Elinor Ostrom
Obesity	Quality of Life	Smoking	Stanley B. Prusiner	Ahmed H. Zewail	View All

**Interact**

Select any location on the Geographic Map location (by brushing your finger over an area on the lectern's touch screen) and topics studied in that area will highlight on the Science Map: the brighter a topic glows, the more papers on that topic originated in the selected area. Conversely, touching a scientific area in the Science Map illuminates places on the Geographic Map where that topic is studied. People and topic buttons support the exploration of publication output by selected Noble laureates and particular lines of research using MEDLINE data from 2000-2009.

## Call for Macroscopic Tools for the *Places & Spaces: Mapping Science* Exhibit (2016) <http://scimaps.org/call>

**Background and Goals**

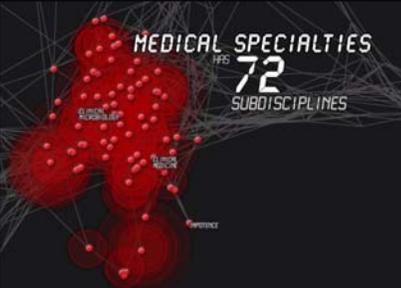

The *Places & Spaces: Mapping Science* exhibit was created to in

(1) communicate human activity and scientific progress on a globe that enable the close inspection of large-scale maps in public conferences; (2) novel, interactive macroscopic tools that let

Themes for the upcoming iterations/years are:

- 11th Iteration (2015): Macroscopes for Interacting With Science
- 12th Iteration (2016): Macroscopes for Making Sense of Science
- 13th Iteration (2017): Macroscopes for Forecasting Science
- 14th Iteration (2018): Macroscopes for Economic Decision Makers
- 15th Iteration (2019): Macroscopes for Science Policy Makers
